

# **CALL FOR PROPOSALS**

Seminar : **Biorefinery, biofuels and « green »  
chemicals from residual biomass**

**During the 79<sup>e</sup> ACFAS congress**

The Industrial Research Chair in Cellulosic Ethanol at the Université de Sherbrooke is proud to be host of the seminar entitled : **Biorefinery, biofuels and « green » chemicals from residual biomass**

Researchers from the field are sollicitated to send an abstract of their presentation **before February 10th 2010**. The abstract should include a title, affiliation and a short description of your research work up to 300 words.

**Themes are:**

- 1-Fractionnaton and biological treatments of biomass
- 2-Ethanol and green molecules
- 3-Thermal treatments
- 4-Catalytic conversion
- 5-Biomass-based composite material
- 6-Economical and life-cycle analysis
